

Project Design Phase

Problem – Solution Fit

Date	30 September 2026
Team ID	6ab7efd38c7c66e706728f94
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Team Details

Role	Name
Team Lead	NAVINA K
Team Member	R Aakash
Team Member	A Mahalakshmi
Team Member	Maheswaran S
Team Member	Sabarinathan

Problem – Solution Fit Canvas

1. CUSTOMER SEGMENT(S) [CS] • Employees who need a standard laptop (new joiners, replacements, refresh cycles) • IT procurement and asset management team • Line managers and approvers raising or approving requests	6. CUSTOMER CONSTRAINTS [CC] • Fixed hardware budget and approval limits • Approved vendor catalogue and standard models only • Dependence on existing ServiceNow workflows and vendor lead times	5. AVAILABLE SOLUTIONS [AS] • Manual e-mail and spreadsheet based requests • Generic service catalogue form with manual follow-up • Pros: familiar. Cons: slow, error-prone, no automatic tracking
2. JOBS-TO-BE-DONE / PROBLEMS [J&P] • Raise a laptop request quickly and correctly • Get approval and place the vendor order without repeated manual steps • Track order status until the laptop is delivered	9. PROBLEM ROOT CAUSE [RC] • Standard laptop orders are handled by hand at every stage • No automated routing of approvals, purchase orders and notifications • Request details are re-entered across systems, causing delays and mistakes	7. BEHAVIOUR [BE] • Users follow up by e-mail or calls to check request status • Approvers delay because requests are unclear or scattered • IT staff copy data between forms, mails and vendor portals
3. TRIGGERS [TR] • A new employee joins or a laptop fails or reaches end of life • Repeated delays and rework in the current ordering process	10. YOUR SOLUTION [SL] • Use ServiceNow Flow Designer to automate standard laptop orders end to end • Catalogue request triggers the flow; approvals are routed automatically • Approved requests create the purchase order and notify the requester at each stage • Fewer manual steps, faster fulfilment, and full visibility of order status	8.1 ONLINE [CH] • Service portal and catalogue request form • E-mail and in-app notifications for approvals and status updates
4. EMOTIONS: BEFORE / AFTER [EM] • Before: frustrated, uncertain about order status • After: confident, informed and in control of the request		8.2 OFFLINE [CH] • Calls or visits to the IT help desk for follow-up • Approvals discussed in person with managers
