

Project Design Phase

Solution Architecture

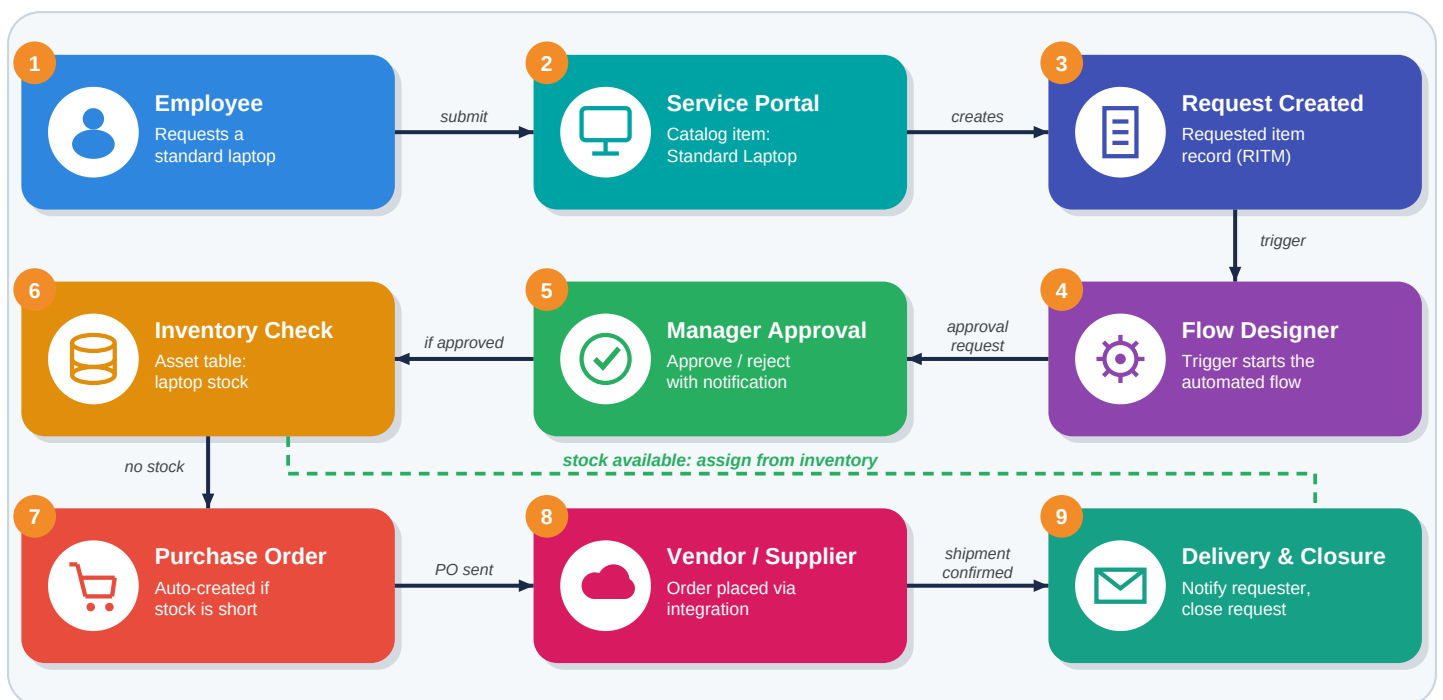

Date	30 September 2026
Team ID	6ab7efd38c7c66e706728f94
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Solution Architecture:

The solution automates the ordering of standard laptops in the IT procurement process. A request raised in the Service Portal triggers a Flow Designer flow that handles approval, stock check, purchase and delivery updates without manual effort. Its goals are to:

- Remove manual effort and delays from standard laptop requests.
- Route every request through approval automatically for full control.
- Check inventory first and raise a purchase order only when stock is short.
- Keep requesters informed with automatic notifications and status updates.

Solution Architecture Diagram:

Path A: laptop in stock, so the flow assigns it from inventory and moves directly to delivery and closure

Path B: laptop out of stock, so the flow raises a purchase order with the vendor, then delivers and closes
