Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Final Validation & Business Sign-Off • 30 September 2026

TEAM ID 6ab7efd38c7c66e706728f94	MODULE Standard Laptop Procurement Automation	PLATFORM ServiceNow Flow Designer	MAX MARKS 4 Marks
-------------------------------------	--	--------------------------------------	----------------------

01 PURPOSE OF UAT

Objective: Verify that automated laptop procurement satisfies business requirements and expected user experience for employees, approvers, procurement staff, and IT support, covering the complete workflow from request submission through delivery confirmation and closure.

02 UAT SCOPE

AREA	VALIDATION SCOPE
Request Management	Standard laptop request creation
Approval Workflow	Manager approval and auto-approval
Inventory Validation	Available stock verification
Procurement Automation	Purchase order generation
Notifications	Email and workflow updates
Asset Management	Asset creation and assignment
Request Closure	Completion and user confirmation

03 UAT TEST CASE ANALYSIS

ID	TEST SCENARIO	EXPECTED RESULT	STATUS
UAT-01	Employee submits laptop request	Request successfully created	PASS
UAT-02	Eligible request processed	Validation completed automatically	PASS
UAT-03	Manager receives request	Approval task assigned correctly	PASS
UAT-04	Auto-approval rule execution	Workflow approved automatically	PASS
UAT-05	Inventory available	Asset allocated from stock	PASS
UAT-06	Inventory unavailable	Purchase order generated	PASS
UAT-07	Status notification delivery	User receives updates	PASS
UAT-08	Asset registration	Asset linked to employee	PASS
UAT-09	Request tracking	User can view current status	PASS
UAT-10	Delivery confirmation	Request automatically closed	PASS

04 DEFECT SUMMARY

SEVERITY	OPEN	CLOSED	UAT DISPOSITION
Critical	0	2	Resolved before UAT sign-off
High	0	3	Fixed and retested
Medium	1	4	Minor UI formatting enhancement pending
Low	2	5	Cosmetic improvements only

Overall: Defect levels remained within acceptable business limits and did not affect process execution.

05 USER FEEDBACK SUMMARY

EMPLOYEE	APPROVER	IT PROCUREMENT
- Request process easier than manual email submission - Visibility of request progress significantly improved - Faster response from procurement workflow	- Approval routing clear and efficient - Notification reminders improve responsiveness	- Reduced manual intervention - Better control over laptop ordering operations - Improved tracking and audit visibility

Feedback aligns with user expectations identified during ideation and customer journey analysis.

06 TEST RESULTS SUMMARY

VALIDATION AREA	TOTAL	PASSED	FAILED	PASS RATE
Functional Validation	10	10	0	100%
Business Process Validation	8	8	0	100%
User Acceptance Validation	10	10	0	100%

OVERALL UAT STATUS

APPROVED

07 BUSINESS VALIDATION OUTCOME

Faster laptop request fulfillment	Automated approval management	Real-time request visibility
Reduced procurement workload	Improved employee experience	Standardized device ordering process

08 SUPPORTING ARCHITECTURE VALIDATION

Request Creation	Approval	Inventory Verification	Procurement	Delivery	Closure
------------------	----------	------------------------	-------------	----------	---------

09 SUPPORTING PROCESS REFERENCES

Project artifacts used during UAT.

10 UAT SIGN-OFF

BUSINESS USER REPRESENTATIVE	APPROVED
PROCUREMENT REPRESENTATIVE	APPROVED
IT OPERATIONS REPRESENTATIVE	APPROVED
PROJECT TEAM LEAD	APPROVED

FINAL RECOMMENDATION

The solution is recommended for deployment because it satisfies defined business requirements, operational expectations, and user acceptance criteria.
