

Data Flow Diagram & User Stories

Date	30 September 2026
Team ID	6ab7efd38c7c66e706728f94
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Team Lead	NAVINA K
Team Members	R Aakash, A Mahalakshmi, Maheswaran S, Sabarinathan
Maximum Marks	4 Marks

Data Flow Diagrams

The data flow diagrams show how a standard laptop order moves from the requester through the Service Catalog, the “Standard laptop task” flow, approval and the Hardware team, and which records are stored along the way.

Level 0 - Context Diagram

Level 1 - Standard Laptop Ordering and Fulfilment

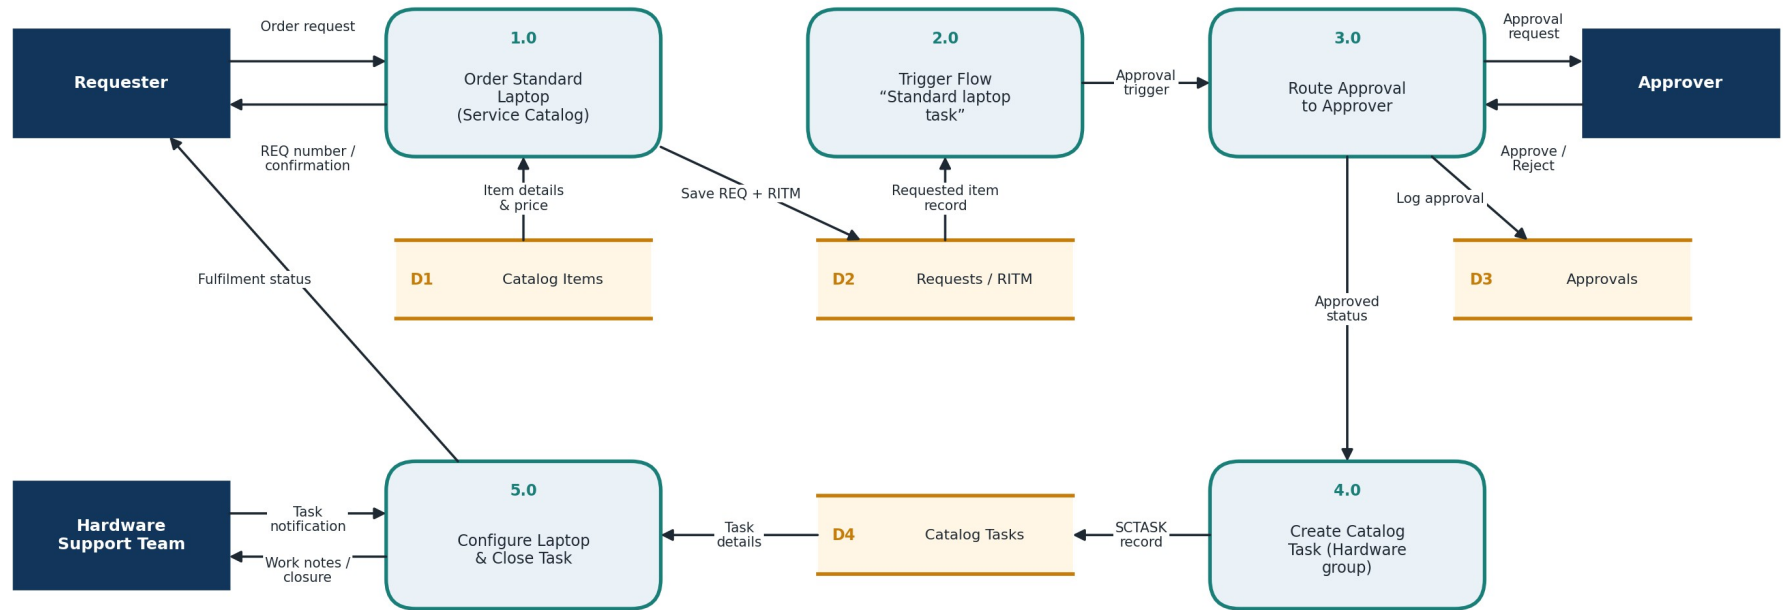

Diagram Elements

Type	Element	Description
Entity	Requester	Employee who orders the Standard Laptop (Lenovo Carbon x1) from the Service Catalog.
Entity	Approver	Person who receives the approval request for the order and approves or rejects it.
Entity	Hardware Support Team	Assignment group that receives the catalog task and configures the laptop.
Process 1.0	Order Standard Laptop	Requester opens Service Catalog > Hardware > Standard Laptop and submits the order; a request (REQ) and requested item (RITM) are created.
Process 2.0	Trigger Flow	The flow “Standard laptop task” starts through its Service Catalog trigger using the Requested Item record.
Process 3.0	Route Approval	The approval request is sent to the approver and the decision is logged.
Process 4.0	Create Catalog Task	The Create Catalog Task action creates a task on sc_task with short description “Laptop need to Configured”, assignment group Hardware and approval Approved.
Process 5.0	Configure Laptop & Close Task	Hardware team works the task (SCTASK) and closes it; the requester sees the fulfilment status.
Data store	D1 – D4	D1 Catalog Items (sc_cat_item), D2 Requests / RITM, D3 Approvals, D4 Catalog Tasks (sc_task).

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Requester	Catalog browsing	USN-1	As a requester, I can open Service Catalog > Hardware > Standard Laptop and view the specifications and price of the laptop.	Item page shows Lenovo Carbon x1 (i5, 512GB SSD) with price \$1,100.00 + \$100.00 annually.	High	Sprint-1
Requester	Order placement	USN-2	As a requester, I can choose the quantity and optional software (Adobe Acrobat, Adobe Photoshop) and place the order using Order Now or Add to Cart.	Request is submitted and the message "Thank you, your request has been submitted" is displayed.	High	Sprint-1
		USN-3	As a requester, I can see my request number and order summary after submitting the order.	Order Status page shows the request number (REQ0010001), estimated delivery date and total.	Medium	Sprint-1
	Request tracking	USN-4	As a requester, I can open my request and see the requested item, approver and stage.	Requested Items, Approvers and Recurring Prices tabs list the related records.	Low	Sprint-3
Administrator	Flow creation	USN-5	As an administrator, I can create a flow named "Standard laptop task" in Workflow Studio (Flow Designer) under the Global application.	Flow is saved as a draft and opens in the flow editor.	High	Sprint-1
		USN-6	As an administrator, I can set the Service Catalog trigger for the flow.	Trigger exposes the Requested Item record to later actions.	High	Sprint-1
	Task automation	USN-7	As an administrator, I can add the Create Catalog Task action with table sc_task, short description "Laptop need to Configured", assignment group Hardware and approval Approved.	Action is saved with the configured field values and appears as step 1 of the flow.	High	Sprint-2
	Activation	USN-8	As an administrator, I can activate the flow so it runs whenever the trigger condition is met.	Activation is confirmed in the dialog and the flow status changes from Draft to Active.	High	Sprint-2
		USN-9	As an administrator, I can attach the flow to the Standard Laptop catalog item using the Process Engine tab.	Flow field on the catalog item shows "Standard laptop task".	High	Sprint-2
Approver	Approval	USN-10	As an approver, I receive an approval request for every standard laptop order.	Approval record with state Requested is listed under the Approvers tab of the request.	High	Sprint-2

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
		USN-11	As an approver, I can approve or reject the request from the approval list.	Approve and Reject options update the approval state.	Medium	Sprint-3
Hardware Support Team	Task fulfilment	USN-12	As a Hardware team member, I get a catalog task created automatically for each laptop order.	Task SCTASK0010001 is created, linked to RITM0010001 and the requester, with state Open.	High	Sprint-2
		USN-13	As a Hardware team member, I can add work notes and close the task after configuring the laptop.	Task can be updated and closed with the Close Task button.	Medium	Sprint-3
